- Automation

KOBETAY BAINUR

WEB DEVELOPER / FRONTEND DEVELOPER

Business websites • E-commerce • UI • Automation

PROFILE

Entry-level web developer and first-year university student focused on building modern, practical websites for small businesses. I create landing pages, product catalogs and e-commerce interfaces with clear structure, responsive design and an easy customer journey from product discovery to inquiry or order.

Approach: fast prototyping, clean UX, iterative improvement and AI-assisted development.

SELECTED PROJECTS

DEMO E-COMMERCE PROJECT

Perfume Store Website

- Product catalog and product detail pages
- Shopping cart and customer order form
- Light / dark theme and responsive layout
- Concept for Telegram / WhatsApp order notifications

BUSINESS WEBSITE CONCEPTS

Small Business Demo Websites

I build tailored demo concepts for real businesses, focusing on brand presentation, clearer navigation, mobile usability, product or service catalogs, inquiry forms and basic integrations.

WHAT I CAN BUILD

Landing Pages

Focused business pages with clear CTA and lead forms.

Catalog Websites

Products, categories, filters and structured navigation.

Order Flows

Cart, forms, Telegram/WhatsApp handoff and notifications.

Website Improvements

Responsive redesign, UX cleanup and feature upgrades.

EDUCATION

KBTU - First-year student

2026 - Present

OPEN TO FREELANCE & REMOTE WEB PROJECTS

From demo concept to a production-ready website and future improvements.
